NAYUDU VENKATA GOWTHAM KUMAR

Software Engineer

Chennai, India | +91-9381706005 | nvgowthamkumar07@gmail.com
linkedin.com/in/n-v-gowtham-kumar-428830190

PROFESSIONAL SUMMARY

Software Engineer with 2+ years at Ford Credit building Java Spring Boot microservices and React applications on Google Cloud Platform (GCP). Delivered RBAC across two applications, event-driven status workflows, and backend pipelines for a production launch. Google Cloud Certified Professional Cloud Architect and Associate Cloud Engineer.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
Backend & APIs: Spring Boot, Microservices, REST APIs, Event-Driven Architecture, FastAPI, Flask
Frontend: React.js, Next.js, Tailwind CSS
Cloud & DevOps: GCP, Cloud Run, Cloud Build, Cloud Tasks, Pub/Sub, Terraform, Docker, Tekton, CI/CD, Git
Databases: PostgreSQL, MySQL
Security & Testing: RBAC, JWT, OTP Authentication, JUnit, Checkmarx, SonarQube, Cycode, 42Crunch
AI Tools: Ollama (LLM Integration), GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer | Ford Credit, Chennai, India **06/2024 – Present**

- Enforced role-based data access across **2 applications** (DMT Mail Transaction Hub, Sodachecks UI), as measured by role-restricted access in backend and UI, by implementing RBAC in Spring Boot and React.
- Enabled real-time vendor document status exchange, as measured by event-driven delivery to upstream/downstream systems with Teams alerts, by architecting a Status Retrieval API on Cloud Tasks, Pub/Sub, and REST.
- Supported the Phase 1 production launch of **3 core UI modules** (Audit, Advanced Search, Dashboard), as measured by on-time data availability, by building their backend data pipelines.
- Automated releases of Java microservices on GCP Cloud Run, as measured by repeatable deployments, by configuring Cloud Build and Tekton CI/CD pipelines.
- Passed release quality gates, as measured by clearing findings from **4 scanning tools** (Checkmarx, SonarQube, Cycode, 42Crunch), by remediating security and code-quality issues.

Software Development Intern | Ford Credit, Chennai, India **08/2023 – 05/2024**

- Contributed to the Digital Mailroom Transformation (DMT) platform, as measured by delivered backend and UI features, by developing Spring Boot services and React components.
- Strengthened security, as measured by resolving critical vulnerabilities from Checkmarx, SonarQube, Cycode, and 42Crunch, by fixing flagged code issues.
- Improved backend reliability and code coverage by writing JUnit unit tests for service logic.
- Validated **3 document flows** (SSD, PIF, VanWagenen) on the GCP mailroom automation platform by testing new features before release.

PROJECTS

SmartEscrow | Full-Stack Talent Marketplace *Next.js, TypeScript, FastAPI, PostgreSQL, Docker*

- Delivered a two-sided marketplace, as measured by end-to-end employer and freelancer workflows (jobs, applications, hourly engagements, timesheets), by building with Next.js and FastAPI.
- Ensured financial traceability, as measured by complete hold, release, and refund flows, by designing a simulated escrow engine with a wallet ledger and double-entry records.
- Automated candidate screening, as measured by skills extracted and candidates ranked against job requirements, by developing a matching module with optional Ollama LLM support.
- Secured user access by implementing JWT authentication and email OTP verification (Resend API with SMTP fallback); deployed via Docker to Render and Vercel.

EDUCATION

M.Tech Integrated, Software Engineering | Vellore Institute of Technology, India **07/2024 | CGPA: 8.17**

CERTIFICATIONS

Google Cloud Certified – Professional Cloud Architect | Google Cloud Certified – Associate Cloud Engineer | Apollo Graph Developer – Associate
